

COMFORTS OF HOME... ON THE ROAD.

Thermo King Inverters give you the power to plug in your devices just like you do at home.

THE POWER YOU WANT, WHEN YOU NEED IT.

Whether you want to run a laptop, recharge your phone or heat food in a microwave, all while watching TV, the type of power the inverter uses is important.

Utilizing **Pure Sine Wave**, which is the same power you get at home, the voltage output is consistent without spikes or valleys. This is crucial when running multiple electronics and appliances at different wattages.

INCREASED CAPACITY FOR MORE CONVENIENCE

The Thermo King inverter now offers continuous **2,000w** of power, allowing you to increase the number of hotel appliances you can use at one time.

The wattage increase allows you to comfortably play a video game (40-140w) as you cool off in front of a fan (50-120w). At night, plug in your sleep apnea machine (30-60w) while charging your cell phone (10w) and laptop (20-75w).

EXTENDED COVERAGE FOR THE EXTRA POWER

To give you that extra protection, Thermo King has expanded its warranty offering by adding an additional year to the contract, so you are now covered for a **full 2 years**.

Unit weight	11 lbs
Unit dimensions	16.378" L x 9.055" W x 4.43" H
Continuous output power	12VDC - 2000w
Peak surge rating	4000w
Output waveform	Pure Sine Wave
Certification	UL458

Harness for connecting inverter into the APU system is include in NEW unit purchases.
